The Mexican International Conference on Artificial Intelligence (MICAI), a yearly international conference series organized by the Mexican Society for Artificial Intelligence (SMIA), is a major international AI forum and the main event in the academic life of the country’s growing AI community. In 2008 Mexico celebrates the 50th anniversary of development of computer science in the country: in 1958 the first computer was installed at the National Autonomous University of Mexico (UNAM). Nowadays, computer science is the country’s fastest growing research area. The proceedings of the
previous MICAI events were published by Springer in its Lecture Notes in Artificial Intelligence (LNAI) series, vol. 1793, 2313, 2972, 3789, 4293, and 4827. Since its foundation in 2000, the conference has been growing in popularity, and improving in quality. This volume contains the papers presented at the oral session of the 7th Mexican International Conference on Artificial Intelligence, MICAI 2008, held October 27–31, 2008, in Atizapán de Zaragoza, Mexico. The conference received for evaluation 363 submissions by 1,032 authors from 43 countries (see Tables 1 and 2). This volume contains revised versions of 94 papers by 308 authors from 28 countries selected - cording to the results of an international reviewing process. Thus the acceptance rate was 25.9%. The book is structured into 20 thematic fields representative of the main current areas of interest for the AI community, plus a section of invited papers:

Everything about Angela “Big Ang” Raiola is larger than life: her lips, her 36JJ breasts, and especially her personality! In a lifestyle guide as genuine and fun as Big Ang herself, the star of VH1’s Mob Wives, called the show’s “den mother” by the New York Times, serves up the hilarious and poignant wisdom she’s learned while running her bar, raising her family, and dating made men. Big Ang has rules to live by for beauty, food, family, friendship, and more. Here she is... ON HER KILLER BOOBS: I was on vacation with my family in the Catskills when out of nowhere, this bat flies right into my chest and then falls splat on the ground. Turned out, he died on impact. ON FAMILY TRADITIONS: Every...
Sunday, we do a feast for fifteen to twenty-five people. Last week, we went through seventy-five meatballs. Even by my family’s standards, that’s a lot of balls. ON DIETING: Swearing off lasagna to lose weight? You might fit into smaller jeans. But you’re still the same person—except hungrier and bitchier. ON HOBBIES: Would I rather cook for people or have sex? No hard-and-fast rule there. But I will say this: Cooking is always satisfying.

Everyone wears a mask. But the deadliest secrets hide in plain sight. Marie St. Jean’s supreme acting talent comes with a price: Every spellbinding performance extracts a piece of her soul. When she reluctantly steps into a role abandoned by another leading lady, she encounters the ghostly spirit that caused the other woman to flee in terror. And who promises to fix Marie’s affliction—for a price. Marie’s other problem—her attraction to alluring violinist, Johann Bledsoe, a temptation she dares not explore. However, with the Prussians surrounding Paris, she is well and truly trapped. Johann left disgrace and his gambling debt behind in England, but a murder outside the Théâtre Bohème makes him fear he’s been exposed. He’d love nothing more than to claim Marie as his own, but after the siege is over, his past will catch up to him again. Under the baleful eye of steam-powered ravens, more murders drive Marie and Johann closer to the truth of what really lurks below the stage, and what dangers hang over their heads. Their only hope could lie in exposing their darkest secrets—and surrendering to the Eros Element in a way that could push them irretrievably close to the edge of madness. Clockwork Phantom is the second book in the Aether Psychics, a thrilling steampunk series with puzzling mysteries and hints of magic. If you like historical mysteries with a scientific—or is it supernatural?—twist, then you’ll love Cecilia Dominic’s Aether Psychics series. Note: Clockwork Phantom can be read on its own or as part of the Aether Psychics series. It was originally titled Light Fantastique.
Almost five hundred pages of shifter menage romance! Even in Shifter Country, wolf shifters are outcasts. They're rough, rugged, hot-tempered, dangerous - and they'll go to any lengths and do anything for their mates. Shifter Country Wolves is a five-book bundle full of alpha wolf shifters, smart, sassy, and curvy women, danger, spice, and men who will go to any lengths to find - and keep - their fated mates. Inside are Running with Wolves, Betting on Wolves, Fighting for Wolves, Uncaging Wolves, and Longing for Wolves.

PC Based Instrumentation and Control is a guide to implementing computer control, instrumentation and data acquisition using a standard PC and some of the most popular computer languages. Numerous examples of configurations and working circuits, as well as representative software, make this a practical, hands-on guide to implementing PC-based testing and calibration systems and increasing efficiency without compromising quality or reliability. Guidance is given on modifying the circuits and software routines to meet the reader's specific needs. The third edition includes updated coverage of PC hardware and bus systems, a new chapter on virtual instruments and an introduction to programming and software development in a modern 32-bit environment. Additional examples have been included, with source code and executables available for download from the companion website www.key2control.com.

Instant answers to your toughest questions on piping components and systems! It's impossible to know
all the answers when piping questions are on the table - the field is just too broad. That's why even the most experienced engineers turn to Piping Handbook, edited by Mohinder L. Nayyar, with contribution from top experts in the field. The Handbook's 43 chapters--14 of them new to this edition--and 9 new appendices provide, in one place, everything you need to work with any type of piping, in any type of piping system: design layout selection of materials fabrication and components operation installation maintenance This world-class reference is packed with a comprehensive array of analytical tools, and illustrated with fully-worked-out examples and case histories. Thoroughly updated, this seventh edition features revised and new information on design practices, materials, practical applications and industry codes and standards--plus every calculation you need to do the job.
