The most comprehensive collection of papers in the field to date, this volume presents state-of-the-art research and commentary from more than fifty of the world's leading ethnobiologists. Covering a wide range of ecosystems and world regions, the papers center on global change and the relationships among traditional knowledge, biological diversity, and cultural diversity. Specific themes include the acquisition, persistence, and loss of traditional ecological knowledge; intellectual property rights and benefits sharing; ethnobiological classification; medical ethnobotany; ethnoentomology; ethnobiology and natural resource management; homegardens; and agriculture and traditional knowledge. The volume will be of interest to scholars in anthropology, ecology, and related fields and also to professionals in conservation and indigenous rights organizations.

The stars or Nakshtras have fascinated most of us during our childhood. During hurly-burly of adulthood, they seemed to be put in background, but come back to centre stage again once we settle down in life and concept of Almighty/ destiny dawns on us. Nakshtras are said to be the abodes into which the fruits of our past labour or Karma is transferred and stored. Thus, Nakshtras distribute the outgrowth of Karma according to the theory of cause and effect. We should look more and more into them and try and identify ourselves with our own Nakshtra to understand ourselves and people around us better. The deity, nature, working style, caste, sex, Yoni, Gunas, Tatwa, Tridosh, body parts, lord of Nakshtra and its Pada, Muhurats, longevity, profession, diseases/ health, marriage, children & relationships and remedial measures for afflicted/ ill placed Nakshtra are unique for each individual and his Nakshtra. This book takes us through a sojourn of cosmic path of 27 Nakshtras. The author hopes this journey is interesting, knowledgeable and satisfying.

Currently ethnobotany has been a subject of wide interest for research in developing and developed countries. The book has been dedicated to the doyen of Indian ethnobiology, Dr. S.K. Jain, FNA, popularly known as 'Father of Indian Ethnobotany'. The book comprises very important articles written by notable ethnobiologists/ botanists on different aspects of ethnobotany. The book would certainly be useful to the students, researchers and teachers working on various aspects of ethnobotany and helpful to various pharmaceutical industries in exploring plants for preparation of new drugs.

Starts with the nakshatra systems under the first part.

This study traces the growth of the concept of divorce through the Dharmasastra, custom, case-law and legislation with special reference to the interpretation of the relevant provisions under the Hindu Marriage Act, 1955, pointing out how the law has influenced society and vice versa. The work is comparative and presents a picture of the role played by English judicial precedent in Hindu law. For the legal profession as well as the student of modern comparative law this book should prove a valuable compact study.
