As a student or professional, experience some of the core concepts of financial modeling and decision making in a fun and engaging way. You will start by developing your own financial models using the Bloomberg terminal. You will then use these models to make important decisions, such as choosing the best investment strategy or evaluating the impact of a new policy. You will also learn how to communicate your findings effectively to others.

Bloomberg Certification Answers
As a professional, you will need to understand how to use the Bloomberg terminal to access financial data and to perform financial analysis. This course will teach you how to use the Bloomberg terminal to conduct financial analysis, including how to access and interpret financial data, how to create and analyze financial models, and how to communicate your findings effectively to others.
