Casio fx-3600Pv An interesting modern variant of Casio's venerable low-end
programmable scientific calculator series, the fx-3600Pv also happens to be a machine with a curious bug, a bug not present in its predecessor, the fx-3600P.
This book should be of interest to statistics lecturers who want ready-made data sets complete with notes for teaching.

Algebraic statistics uses tools from algebraic geometry, commutative algebra, combinatorics,
and their computational sides to address problems in statistics and its applications. The starting point for this connection is the observation that many statistical models are semialgebraic sets. The algebra/statistics connection is now over twenty years old, and this book presents the first broad introductory
treatment of the subject. Along with background material in probability, algebra, and statistics, this book covers a range of topics in algebraic statistics including algebraic exponential families, likelihood inference, Fisher's exact test, bounds on entries of contingency tables, design of experiments, identifiability of hidden
variable models, phylogenetic models, and model selection. With numerous examples, references, and over 150 exercises, this book is suitable for both classroom use and independent study.

The importance and value of the book Endless Bliss is explained briefly right
in the second page of the same book by Sayyid Ahmad Mekkî Beg, a great islamic scholar who was Sayyid Abdulhakim Arwâsî's precious son. Endless Bliss consists of six fascicles. This fourth fascicle includes some essential topics like; various aspects of Hanafi Fiqh are explained, e.g., taharat,
najasat, ghusl, wudu, tayammum, water, satr, women's covering themselves, adhan, iqamat, namaz, traveler's namaz, juma prayer, and music. Alongside these topics, this book also includes some letters (which were translated from Persian) written by the islamic scholars of 16th century India, Imam
