A theoretically astute overview of key developments in art and its contexts since the 1990s
The concept of the avant garde is highly contested, whether one consigns it to history or claims it for present-day and future uses. The first volume of The Idea of the Avant Garde - And What It Means Today provided an unprecedented forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism. This second volume presents the work of 50 artists and writers who explore the diverse ways that today's avant-gardism renews the project of aesthetic and political praxis. The manifest strategies, temporalities and genealogies of avant-gardism are expressed through an international, intergenerational and interdisciplinary convocation of ideas that covers the fields of film, video, architecture, visual art, art activism, literature, poetry, theatre, performance, music and intermedia."More than one hundred years after the eruption of Dada and fifty years after its loudly proclaimed death, the spectre of the avant garde returns in renewed and vibrant forms. This excellent collection gives an overview of just how and why a renewed experimental artistic politics is important." - Stephen Shukaitis, author of The Composition of Movements to Come: Aesthetics and Cultural Labor After the Avant-Garde."One hundred years after the October Revolution, why does art continue to be meaningful in terms of ideological disruption, that is, in avant-garde terms? If you are looking to understand this question, The Idea of the Avant Garde is the place to start. Navigating the decade marked by the financial apocalypse of 2008, this volume introduces the twenty-first century anti-capitalist zeitgeist in no uncertain terms: art reserves the right to not let us lose sight of what is wrong, who is responsible and what it means to take sides." - Angela Dimitrakaki, author of Gender, ArtWork and the Global Imperative: A Materialist Feminist Critique. 80 illustrations

Global Feminism features more than eight contemporary women artists, working in a wide variety of media, from fifty countries, each offering new perspectives on women's artistic expression in different
regions of the world. This book moves the discourse of feminism art toward a new internationalism that emphasizes not only the cultural differences among women but also the ever changing perceptions of feminism.

In 2013 Georg Baselitz declared that 'women don't paint very well'. Whilst shocking, his comments reveal what Helen Göröll argues is prolific discrimination in the artworld. In a groundbreaking study of gender and value, Göröll proves that there are few aesthetic differences in men and women's painting, but that men's art is valued at up to 80 per cent more than women's. Indeed, the power of masculinity is such that when men sign their work it goes up in value, yet when women sign their work it goes down. Museums, the author attests, are also complicit in this vicious cycle as they collect tokenist female artwork which impinges upon its artists' market value. An essential text for students and teachers, Göröll's book is provocative and challenges existing methodologies whilst introducing shocking evidence. She proves how the price of being a woman impacts upon all forms of artistic currency, be it social, cultural or economic and in the vanguard of the 'Me Too' movement calls for the artworld to take action.

In this book, contributors identify and explore a range of iconic works – "Mistress-Pieces" – that have been made by feminists and gender activists since the 1970s. The first volume for which the defining of iconic feminist art is the raison d'ètre, its contributors interpret a "Mistress-Piece" as a work that has proved influential in a particular context because of its distinctiveness and relevance. Reinterpreting iconic art by Alice Neel, Hannah Wilke and Ana Mendieta, the authors also offer important insights about works that may be less well known – those by Natalia LL, Tanja Ostoji?, Swoon, Clara Menéres, Diane Victor, Usha Seejarim, Ilse Fusková, Phaptawan Suwannakudt and Tracey Moffatt, among others. While in some instances revealing cross influences between artists working in different frameworks, the publication simultaneously makes evident how social and political factors specific to particular countries had significant impact on the making and reception of art focused on gender. The book will be of interest to scholars working in art history, visual studies and gender studies.

Artwork and popular cultures are crucial sites of contesting and transforming power relationships in world politics. The contributors to this edited collection draw on their experiences across arts, activist, and academic communities to analyze how the global politics of colonialism, capitalism, and patriarchy are expressed and may be transformed through popular cultures and artistic labour. Through their methodological treatment of artwork and popular cultures as material sites of generating aesthetic knowledge and embodying global power, the authors foreground an analysis of global hierarchies and transformative empowerment through critically engaged political imagination and cultural projects. By centralizing an intersectional analysis of the racialized, gendered, economic dimensions of the praxis of culture, The Art of Global Power demonstrates how artwork and popular culture projects, events, and institutions are vital sites of transgressing the material conditions that produce and sustain unjust global power hierarchies. This book intervenes in the international relations popular culture literature by problematizing the idea of a single homogenizing global popular culture and engaging with multiple popular cultures articulated from diverse global locations and worldviews. To the international relations aesthetics literature this book contributes an intersectional analysis of aesthetics as an embodied process of knowledge production and action that takes place within global conditions of colonialism, capitalism, and patriarchy. This book will be of interest to students, researchers and practitioners of international relations, and gender, cultural and media studies.

In recent years, the term global art has become a catchphrase in contemporary art discourses. Going beyond additive notions of canon expansion, this volume encourages a differentiated inquiry into the complex aesthetic, cultural, historical, political, epistemological and socio-economic implications of both the term global art itself and the practices it subsumes. Focusing on diverse examples of art,
curating, historiography and criticism, the contributions not only take into account (new) hegemonies and exclusions but also the shifting conditions of transcultural art production, circulation and reception.

Transnational Perspectives on Feminism and Art, 1960–1985 is a collection of essential essays that bring transnational feminist praxis into conversation with histories of feminist art in the 1960s, 1970s, and early 1980s. The artistic practices and processes examined within these pages all centre on gender and sexual politics as they variously intersect with race, class, sovereignty, Indigeneity, citizenship, and migration at particular historical moments and within specific geopolitical contexts. The book’s central premise is that reconsidering this period from transnational feminist perspectives will enable new thinking about the critical commonalities and differences across heterogeneous and geographically dispersed practices that have contributed to the complex and multifaceted relationship between feminism and art today. The book will be of interest to scholars working in art history, cultural studies, visual culture, material culture, and gender studies.
