The second edition of this book is virtually a new book. It is the only comprehensive text on the safety of essential oils and the first review of essential oil/drug interactions and provides detailed essential oil constituent data not found in any other text. Much of the existing text has been re-written, and 80% of the text is completely new. There are 400 comprehensive essential oil profiles and almost 4000 references. There are new chapters on the respiratory system, the cardiovascular system, the urinary system, the digestive system and the nervous system. For each essential oil there is a full breakdown of constituents, and a clear categorization of hazards and risks, with recommended maximum doses and concentrations. There are also 206 Constituent Profiles. There is considerable discussion of carcinogens, the human relevance of some of the animal data, the validity of treating an essential oil as if it was a single chemical, and the arbitrary nature of uncertainty factors. There is a critique of current regulations.

"The book is both a personal story and an insightful journey into holistic living and parenting. Perhaps the most powerful thread weaving through both Maria's personal story and her advice on traveling a holistic path, is the message that women must rediscover their mothering intuition and learn to trust their gut instincts. Listening to one's inner voice is one of the greatest skills any parent can cultivate, whether they choose to follow holistic parenting, or a more conventional route. -- Nancy Peplinsky, founder and executive director, Holistic Moms Network "Maria's path of discovery has achieved something very rare and precious. That she has been willing to share her wisdom with us is a priceless gift." -- Kim John Payne, M.Ed., author of Simplicity Parenting, Beyond Winning, and The Soul of Discipline. "This book reflects the intuitive and practical experiences of Maria on her path of conscious parenting. Through her experiences, readers are able to expand their awareness for their own journey as well. Kudos, Maria for an authentic, insightful book. -- Jeanne Ohm, DC, executive editor and publisher, Pathway to Wellness Magazine

This step-by-step guide to nutritional therapy and colon cleansing includes important self-help strategies for people who want to take responsibility for their own health and well-being. Author Kristina Amelong is a colon hydrotherapist and nutritional counselor who describes her own five-year battle with Irritable Bowel Syndrome and the tools she used to recover. The program that Kristina has designed includes the nutritional research work of Dr. Weston A. Price who studied the diets of fourteen traditional societies during the 1930s and 1940s. His goal was to understand what made human beings healthy and what allowed them to have perfect teeth. The food Kristina recommends to readers are the traditional foods that gave health to the populations that Price researched. When people remove accumulated waste material in their bowel, the body can regenerate with the nutrients available in the Weston A. Price diet. Detoxification and simple, nourishing foods cause people to thrive much like the disease-free native cultures that Price studied.
