Jabatan Kerja Raya JKR Malaysia (K KK) I am currently on the Summer Placement programme as a Web Designer with Application and Web Development Unit at JKR (Jabatan Kerja Raya) Malaysia head office in Jalan Sultan Salahuddin Kuala Lumpur, Malaysia. On the first day, I had been in an interview with the head of the information technology division En. Ahmad bin Daud. He asks about me and the areas I learned. After that, he gave the ...

The only investment class that earlier was reachable by everybody, are now become exclusive and can only be bought by high income group. The burdening of high price of consumer product with low income growth has squared further the middle class group into the financial trap. With Malaysia heading towards high income nation, the high house prices become the key issue need to be address in order to balance the socioeconomic growth.

This book is a part of ICL new book series “ICL Contribution to Landslide Disaster Risk Reduction” founded in 2019. Peer-reviewed papers submitted to the Fifth World Landslide Forum were published in six volumes of this book series. This book contains the followings: • Four Forum lectures and one award paper • Sendai Landslide Partnerships, Kyoto Landslide Commitment, and International Programme on Landslides. • Landslide-induced tsunamis • Landslides at UNESCO designates sites and contribution from WMO, FAO, and IRDR • Education and Capacity Development for Risk Management and Risk Governance Prof. Kyoji Sassa is the Founding President and the Secretary-General of International Consortium on Landslides (ICL). He has been the Editor-in-Chief of International Journal Landslides since its foundation in 2004. Prof. Matjaž Mikšič is the Vice President of International Consortium on Landslides and Vice President of Slovenian Academy of Engineering. He is a Professor and Dean of Faculty of Civil and Geodetic Engineering, University of Ljubljana, Slovenia. Dr. Shinji Sassa is Head of Soil Dynamics Group and Research Director of International Research Center for Coastal Disasters, Port and Airport Research Institute, National Institute of Maritime, Port and Aviation Technology, Japan. Prof. Peter Bobrowsky is the President of International Consortium on Landslides. He is a Senior Scientist of Geological Survey of Canada, Ottawa, Canada. Prof. Kaoru Takara is the Executive Director of International Consortium on Landslides. He is a Professor and Dean of Graduate School of Advanced Integrated Studies (GSAIS) in Human Survivability (Shishu-Kan), Kyoto University. Dr. Khang Dang is the Secretary General of the Fifth World Landslide Forum. He also serves as the Research Promotion Officer of ICL and a Lecturer at the University of Science, Vietnam National University, Hanoi.

This book contains selected papers from SEB-18, the Tenth International Conference on Sustainability in Energy and Buildings, which was organised by KES International and Griffith University and held in Gold Coast, Australia in June 2018. SEB-18 invited contributions on a range of topics related to sustainable buildings and renewable energy, and explored innovative topics regarding intelligent buildings and cities. Applicable areas included the sustainable design and of buildings, neighbourhoods and cities (built and natural environment); optimisation and modelling techniques; smart energy systems for smart cities; green information communications technology; and a broad range of solar, wind, wave and other renewable energy topics. The aim of the conference was to bring together researchers and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. In addition, SEB-18 offered an exciting opportunity to present, interact, and learn about the latest research in Sustainability in Energy and Buildings.

Over the last decade, Malay ethnic identity has taken on new life compared to religious identity in and outside Malaysia. This book explores key emblematic features of ethnic and religious identity and the idea of “Malayness” in Australia at a time when Islamic identity has gained prominence on the global stage. The author explores topics such as: • Religion as a powerful basis of personal and collective identification for Malay-Muslim postgraduate students in Western Australia; • Experiences of Malay-Muslim postgraduate students and their relation to Islamic values; • Islamic revivalism and the middle class; • Ethnic and religious factors related to interpersonal communication. Other studies on Malays in Australia tend to focus on the past instead of the problems that new Malays possibly going to face when they reach the continent. This book overcomes that limitation and makes headway in addressing cultural differences related to identity, ethnicity, and religion.

Meeting the Pump Users Needs is a documentation of the 12th International Pump Technical Conference. Pump makers have always understood that their equipment provides an essential service to the pump users. Pumps have been designed and built to satisfy the needs of the user. The main thrust of this book is to share between users, specifiers, and makers their knowledge and experiences leading to better understanding of what the user needs now and would like for the future, and what the designer/maker can provide now and may be able to offer for the future. This book also describes an unusual method of calculating a head generated across a multistage pump when the impeller diameters are changed. The method leads to significantly larger calculated changes of head than predicted from the conventional affinity law approach. This text is a useful reference and source of information for engineering students and those conducting research on pump manufacturing.
