This book seeks to get the attention of the Christian community that calls themselves the body of Christ, because the revelation that God has given author Howard Bean concerning this book is to open the blinded eyes of those that have become hardhearted, rebellious, and backslidden, to what God says in his Word. The prophets that have been used in this book present a clear picture of the type of apostasy that we have today, which are those who twist his Word and disobey the word of God. This book is to warn the church of the apostasy that they have gotten themselves into as Israel had done against God, years ago in the Old Testament. If we, as children of God, will open his Word and asked him to open our blinded eyes in the name of Jesus for the truth that is not being preached today in many churches, then he will do so as Jesus said-ask and you shall receive. In many ways, this book can be used as a guide to help Christians study the Word of God, but it is not to replace the Word as many have and caused error in the church. It also can be used in Sunday school as a tool to help teach students, from teenagers to adults, the truth of how God expects his children to live for him and have faith, as the prophets of the Old Testament shows every one today.

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada’s automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can’t beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.
