Students explore varied subjects in human society and its environment to learn about history, geography, people, societies and culture. In HSIE the subjects of history and geography are mandatory from Kindergarten to Year 10 where students study specific historical and geographical concepts and skills. Students also have an opportunity to learn more about people and the societies and environments in which they live through elective subjects.

This volume addresses the need for an international perspective on global education, and provides alternate voices to the theme of global education. The editors asked international educators in different contexts to indicate how their own experience of global education addresses the broad and contested concepts associated with this notion. Following the lead of the internationally acknowledged authors from North America, Europe, Africa, Australia, and Asia, perspectives were provided on a wide variety of contexts including tertiary education, and teacher education; various pedagogies for global education, including digital pedagogies; and curriculum development at school, tertiary and community levels. Contesting and Constructing International Perspectives in Global Education explores the tensions inherent in discussions of global education from a number of facets including spatial, pedagogical, temporal, social and cultural; and provides critical, descriptive and values-laden interpretations. The book is divided into five sections, “Temporal and Spatial Views of Global Education”; “Telling National Stories of Global Education”; “Empowering Citizens for Global Education”; “Deconstructing Global Education”; and “Transforming Curricula for Global Education”. It is envisaged as a starting point for a stronger international conception of global education and a way to build a conversation for the future of global education in a neo-liberal and less internationally confident time.
Language Teachers’ Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers’ work, and their students’ success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of ‘levels’ of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term ‘professional knowledge landscape’ is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed success in a rural program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: ‘What blocks language learning in Australia?’ They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers’ ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: ‘It is us’ who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

When Grandma Poss's magic turns Hush invisible, the two possums take a culinary tour of Australia to find the food that will make her visible once more.

In each spread of this bold and humorous picture book, available for the first time since 1995, children can examine their place in the world around them through detailed and engaging maps. Twelve beautifully illustrated maps such as Map of My Day and Map of My Tummy will fascinate children. When finished reading the book, children can
unfold the jacket -- it turns into a poster-size map!

Maps can show you where you are anywhere in the world! A beloved bestseller that helps children discover their place on the planet, now refreshed with new art from Qin Leng. Where are you? Where is your room? Where is your home? Where is your town? This playful introduction to maps shows children how easy it is to find where they live and how they fit in to the larger world. Filled with fun and adorable new illustrations by Qin Leng, this repackage of Me on the Map will show readers how easy it is to find the places they know and love with help from a map.

A wizard's hat blows into town, changing people into different animals when it lands on their heads.

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

"Lewin: Wild Art is the story of John William Lewin (1770–1819) – Australia's first professional artist to arrive in the young colony as a free man – and his startling response to our landscape, flora and fauna."--P. 1.
