Mbti Group Activities - mallaneka.com
Give each group a package of Legos and instruct them to build something with the Legos. Amazingly, Intuitive types will usually build an abstract model that no one can identify, while the Sensing types will usually build a very practical, concrete model that everyone can identify. It is so fun to eavesdrop as they are working!

MBTI Preference Exercises - The Myers-Briggs
Divide your participants into equal groups. Allow one person from each group to view the items at a time, followed by the next person in each group until everyone has had 15 seconds to see the items. Set a time limit of two minutes for the teams to write down as many items they can remember.

Practical collection of fresh activities for consultants working in the career guidance and development realm, specialists, trainers, career advisers, and HR managers. 20+ exercises designed and selected (especially for use with MBTI and personality type practice), including get-to-know exercises, icebreakers, warm-ups, and sum-up exercises. The exercises are based on various techniques and methods, selected specifically for career and self-development, and tested during my trainings and group activities.Detailed descriptions of all the exercises, materials, task instructions, suggestions for adapting different audiences, as well as examples of exercise application from my own classes. These fresh exercises that will give depth and reflection to your career guidance sessions (both individual and in groups) and make them more interesting and relevant for your demanding clients.Example. Exercise "3 in 1". This exercise is especially fun for adolescents and students! Yet, it is well accepted by any participants. It not only allows for working out the functions in an exciting and creative way, but also for getting new ideas and insights for startups or business development. At the same time, it motivates the participants to practice finding new solutions at a junction of ordinary and seemingly simple things.Application: Teams of 3-5 people, split into Sensing (S) and Intuition (N). Time: 60-80 minutes. Materials: flipcharts, A1, A4 and A6 (card) paper sheets, pens and felt pens/markers.Description: 1) each participant writes their hobby on the cards (1-3 options, 1 card = 1 hobby). Then, the trainer collects all the cards, shuffles and randomly puts them on the table, blank side up. 2) each team of 3-5 people picks up 3 cards. The teams can replace one hobby during the first 7 minutes. 3) in 30 minutes the teams have to come up with an idea for a business or a startup based on the chosen hobbies. Example: One of the teams from my sessions picked up the following hobbies - football, photography, and cooking. The participants came up with the idea of "Footbobar", which serves specially created "football"-dishes and drinks (it's about the cooking hobby). In the "Footbobar", you can also watch football and buy some football stuff (it's about the football hobby). The "Footbobar" will be promoted through Instagram (it's about the photography hobby). Also, the founders will encourage visitors to propose their ideas for "football" dishes and drinks and organize special events for these people and their friends, offering an exclusive menu with the dishes they've proposed. 4) each team presents its project. Usually ideas and presentations of the S-teams are more practical and solve specific problems. The N-team ideas are usually more creative and general.Discussion: - How different is the team's approach? - How can the different approach be manifested in real situations? - Are there interesting ideas for further development?

I would like to enthusiastically recommend The SAGE Handbook of E-Learning Research. An international set of authors have produced a highly readable handbook that covers topics in e-learning research, theory, policy, language and literacy, and design issues. The work draws on multiple perspectives ranging from early work in asynchronous learning networks to community organization in e-learning. This is a large and much needed work that organizes and illuminates issues in E-learning in a way that readers will be able to take away practical advice for their own use. I am quite pleased to see this handbook that provides a very useful organization of knowledge for our field" - John Bourne, Ph.D Professor and Executive Director, The Sloan Consortium (www.sloan-c.org) This book is an important contribution to the development of E-learning because its account of the research always begins with the context of learning from which the exploitation of technology can be viewed. The authors help us understand that technology affords new kinds of relationship between the learner and what is learned, and how it is learned. With this rich understanding, the book is able to build the wide-ranging research foundation on which the field can move forward' - Diana Laurillard, Institute of Education, University of London 'A comprehensive and compelling resource that provides a global perspective on a development that is transforming higher education' - David Pilbsly, Chief Executive, Worldwide Universities Network 'Unlike many how-to books on the topic...this work focuses on research for educators and others interested in how technology enhances or diminishes learning. Highly Recommended' - Choice Magazine This handbook provides a state-of-the-art, in-depth account of research in the rapidly expanding field of E-learning. The first of its kind, it provides reviews of over 20 areas in E-learning research by experts in the field, and provides a critical account of the best work to date. The contributors cover the basics of the discipline, as well as new theoretical perspectives. Areas of research covered by the Handbook include: - Contexts for researching e-learning - Theory and policy - Language and literacy - Design issues - History of the field The editors' introduction and many of the chapters show how multiple aspects of E-learning interact. The introduction also provides a new model for researching the field. This book is relevant for everyone in higher education, from undergraduate to faculty, as well as university administrators involved in

providing E-learning. It will provide a research background for higher education, including universities, training colleges, and community colleges. It will also be relevant to those involved in any research and developmental aspect of E-learning - corporate trainers and those involved in online programs at secondary school or in virtual high schools. Whether you are a lecturer, researcher or programme designer, this is an essential read. Richard Andrews is Professor in English at the Institute of Education, University of London and Visiting Professor at New York University's Steinhardt School of Education, Culture and Human Development. Caroline Haythornthwaite is Associate Professor at the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign.

The Myers-Briggs Type Indicator (MBTI) is a development of the work of Carl Jung, who suggested the basic personality types of introversion and extraversion and the components of intuition, sensation, thinking and feeling. The indicator provides insights into and offers a framework for use in counselling, education, careers guidance and management.

12 NEW, USER-PROVEN EXERCISES for MBTI TEAM-BUILDING CORPORATE trainings, assessments, consultations. They'll help you achieve your own stellar track record of successful training and satisfied customers.

As much as adult learners can absorb in a classroom, they learn and retain a lot more on the job. Action Learning, or AL, can be based on any of several different schools of thought, and there is much debate as to which is ideal. The authors advocate tailoring the best attributes of each approach to the specific purpose and the learning environment. Drawing on theory from Self-Directed Learning, Learning from Experience, and Transformative Learning, Understanding Action Learning enables the reader to make an informed decision about which approach or combination to use in his or her organization, and provides: * a theoretical model that explains the different approaches to AL, and a framework for identifying which approach to use * a focus on co-design in creating Action Learning programs * practical tools, assessments, and exercises * illuminating stories and case studies from the field Combining top-shelf research with real-world experience, Understanding Action Learning is a crucial resource for adult educators everywhere. "This updated resource covers all aspects of architectural practice, featuring: new material of sustainable design, managing multiple offices, lifelong learning, mentoring, and team building; revised content on programming, project management, construction contract administration, risk management, and ethics; and coverage of small firm considerations as well as emerging issues such as integrated practice and integrated project delivery."--Jacket.

Performance Coaching offers a guide to the fundamentals of coaching with an overview of all the key principles, tools and case studies you need to develop more advanced knowledge. Whether you're thinking about becoming a coach, already running a professional coaching practice or thinking about how you can embed a coaching culture in your organization, Carol Wilson illustrates how to develop a best practice approach. Using practical tools throughout and with international case studies to illustrate the various cultural challenges coaches and managers can face, Performance Coaching is a complete resource for developing coaching in any organization. This new edition of Performance Coaching has been completely updated to offer a greater focus on building a coaching culture in organizations and the challenges that leaders face in understanding and developing a coaching approach.

Contains more than sixty exercises collected from experienced, successful MBTI consultants, compiled and organised to provide trainees with learning experiences ranging from understanding the preference scales to how to plan a workshop.

Personality has emerged as a key factor when trying to understand why people think, feel, and behave the way they do at work. Recent research has linked personality to important aspects of work such as job performance, employee attitudes, leadership, teamwork, stress, and turnover. This handbook brings together into a single volume the diverse areas of work psychology where personality constructs have been applied and investigated, providing expert review and analysis based on the latest advances in the field.
