Community-based research (CBR) offers useful insights into the challenges associated with conducting research and promoting positive impacts in the communities where the research takes place. This depends on two important variables: the researchers, and the communities. Researchers and practitioners must develop skills in how to design research, and detail how researchers and communities should get to know one another, as well as how best to utilize their powers of data analysis and will prove invaluable to both students and experienced researchers across all of the social sciences.

Thinking With Theory In Qualitative Research is highly accessible and engaging for students, helping guide the reader through what might be new theoretical terrain, interludes that explain the possibilities of different samples.

Occupational Prestige Index, ethical guidelines for research, a sample questionnaire, and brief listing of commands for SPSSX and SPSS PC+.
