AFTER WE FELL...

Life will never be the same. #HESSA

Just as Tessa makes the biggest decision of her life, everything changes. Revelations about first her family, and then Hardin’s, throw everything they knew before in doubt and makes their hard-won future together more difficult to claim. Tessa’s life begins to come unglued. Nothing is what she thought it was. Not her friends. Not her family. The one person she should be able to rely on, Hardin, is furious when he discovers the massive secret she’s been keeping. And rather than being understanding, he turns to sabotage. Tessa knows Hardin loves her and will do anything to protect her, but there’s a difference between loving someone and being able to have them in your life. This cycle of jealousy, unpredictable anger, and forgiveness is exhausting. She’s never felt so intensely for anyone, so exhilarated by someone’s kiss—but is the irreplaceable heat between her and Hardin worth all the drama? Love used to be enough to hold them together. But if Tessa follows her heart now, will it be...the end?

On Christmas Eve 1971, the packed LANSA flight 508 from Lima to Pucallpa was struck by lightning and went down in dense jungle hundreds of miles from civilization. Of its 93 passengers, only one survived: Juliane Koepcke, the seventeen-year-old child of famous German zoologists. She’d been thrown from the plane two miles above the forest canopy, but had sustained only a broken collarbone and a cut on her leg. With incredible courage, instinct and ingenuity, she survived three weeks in the “green hell” of the Amazon – using the skills she’d learned in assisting her parents on their research trips into the jungle – before coming across a logger’s hut, and, with it, safety. Now she tells her fascinating story for the first time, and in doing so tells us about her ‘Gerald Durrell’ childhood – with a menagerie of wild, exotic and sometimes dangerous pets - about how she learned to survive at her parents ecological station deep in the rainforest and about her present-day commitment to this wildlife as a biologist and dedicated environmentalist.
