The handbook's chapters are divided into three parts: Inquiry, Practice, and Transfer. Within each chapter, instructional strategies are organized around focal academic content: English language arts, mathematics, science, history, or social studies. Each chapter's focus on a particular content area is designed to guide students' thinking about the inquiry process and to foster their ability to apply and transfer the academic skills in their work. Throughout the handbook, students are also provided with opportunities to work with and extend their academic skills in other contexts. For example, students are given opportunities to think critically and engage in meaning-making conversations that support their developing academic literacy.

Teachers Edition Keystone Level C

New Keystone, designed for students aged 10 to 14, is the third edition of the highly successful reading and language development program. It offers targeted instruction that blends cognitive and linguistic development with an emphasis on language development. This proven approach supports diverse learners, potentially enabling the same content to be used in grades 3 through 8. The content of New Keystone is organized as a series of lessons and activities that build an understanding of the academic language that is necessary for success in secondary school subjects. These lessons and activities are designed to help students understand the academic language that they will encounter in the content areas of English language arts, mathematics, science, and social studies. They are also designed to help students use the academic language that they have learned in English language arts to understand and analyze content in these other areas. In addition, the handbook includes activities and projects that help students develop the academic literacy skills that are essential for success in secondary school subjects.
