Jason W. Ellis—amazon.com

In his foreword to The Postnational Fantasy, esteemed sf scholar Donald M. Hassler aptly remarks that "this collection
of essays seems both alien and massively important at the same time" (1). This comment reveals the marginal territory to which examinations of sf through the lens of postcolonial...
theory have been relegated while acknowledging a significant wind change.

"Postcolonial Science Fiction" by Ransom, Amy J

Like all of our writing prompts, these fantasy fiction prompts
and plot ideas are varied on a number of different subjects that can fit into the fantasy genre. Many of these fiction writing prompts can be used for sub-genres of fantasy, such as paranormal.
In twelve critical and interdisciplinary essays, this text examines the relationship between the

Page 51/93
fantastic in novels, movies and video games and real-world debates about nationalism, globalization and cosmopolitanism. Topics covered include science fiction and postcolonialism, issues of
ethnicity, nation and transnational discourse. Altogether, these essays chart a new discursive space, where postcolonial theory and science fiction and fantasy studies work
cooperatively to expand our understanding of the fantastic, while simultaneously expanding the scope of postcolonial discussions.

This book makes connections between
mythopoeic fantasy--works that engage the numinous--and the critical apparatuses of ecocriticism and posthumanism. Drawing from the ideas of Rudolf Otto in *The Idea of the Holy*, mythopoeic fantasy is a...
means of subverting normative modes of perception to both encounter the numinous and to challenge the perceptions of the natural world. Beginning with S.T. Coleridge's theories of the imagination as
embodied in *The Rime of the Ancient Mariner*, the book moves on to explore standard mythopoeic fantasists such as George MacDonald, C.S. Lewis, and J.R.R. Tolkien. Taking a step outside these
men, particularly influenced by Christianity, the concluding chapters discuss Algernon Blackwood and Ursula Le Guin, whose works evoke the numinous without a specifically Christian
The birth of modern fantasy in 1930s Britain and America saw the development of new literary and film genres. J.R.R. Tolkien created modern fantasy with *The Lord of the Rings*, set in a worldview.
fictional world based upon his life in the early 20th century British Empire, and his love of language and medieval literature. In small-town Texas, Robert E. Howard pounded out his own fantasy realm in
his Conan stories, published serially in the ephemeral pulp magazines he loved. Jerry Siegel created Superman with Joe Shuster, and laid the foundation for perhaps the most far-reaching
fantasy worlds: the universe of DC and Marvel comics. The work of extraordinary people who lived in an extraordinary decade, this modern fantasy canon still provides source material for the most successful
literary and film franchises of the 21st century. Modern fantasy speaks to the human experience and still shows its origins from the lives and times of its creators. Prolific, popular and
critically acclaimed, Michael Moorcock is the most important British fantasy author of his generation. His Elric of Melniboné is an iconic figure for millions of fans but Moorcock has
also been a pioneer in science fiction and historical fiction. He was hailed as the central figure of the “New Wave” in science fiction, and has won numerous awards for his fantasy and SF, as well as his

“mainstream” writing. This first full-length critical look at Moorcock’s career, from the early 1960s to the present, explores the author’s fictional multiverse: his fantasy tales of
the “Eternal Champion”; his experimental Jerry Cornelius novels; the hilarious science-fiction satire of his “End of Time” books; and his complex meditations on 20th century history in
Mother London and the Colonel Pyat tetralogy.

Do you find yourself contemplating the imminent end of the world? Do you wonder how society might reorganize itself to cope with global...
cataclysm? (Have you begun hoarding canned goods and ammunition...?)

Visions of an apocalypse began to dominate mass media well before the year 2000. Yet narratives since then present decidedly...
different spins on cultural anxieties about terrorism, disease, environmental collapse, worldwide conflict and millennial technologies. Many of these concerns have been made...
metaphorical: zombie hordes embody fear of out-of-control appetites and encroaching disorder. Other fears, like the prospect of human technology's turning on its creators, seem more reality
based. This collection of new essays explores apocalyptic themes in a variety of post-millennial media, including film, television, video games, webisodes and smartphone apps.
A literary genre that pervades 21st-century popular culture, science fiction creates mythologies that make statements about humanity’s place in the universe and embody an intersection of
science, religion and philosophy. This book considers the significance of this confluence through an examination of myths in the writings of H. G. Wells, Arthur C. Clarke, Philip K. Dick.
and Frank Herbert. Presenting fresh insights into their works, the author brings to light the tendency of science fiction narratives to reaffirm spiritual myths. One of the major
figures in science fiction for more than sixty years, James Gunn has been instrumental in making the genre one of the most vibrant and engaging areas of literary scholarship. His genre history
Alternate Worlds and his The Road to Science Fiction anthologies introduced countless readers to science fiction. He founded the Gunn Center for the Study of Science Fiction in 1982. But...
Gunn has also been one of the genre’s leading writers. His classic novels Star Bridge (with Jack Williamson), The Joy Makers, The Immortals and The Listeners helped shape the field. Now in his nineties, he...
remains a prominent voice. His forthcoming novel is Transformation. Drawing on materials from Gunn’s archives and personal interviews with him, this study is the first to examine the life, career and
writing of this science fiction grandmaster.

The subjects of this book constitute a significant cross section of BBC science fiction television. With such characters as the Doctor.
(an enigmatic time-traveling alien), Kerr Avon (a problematic rebel leader), Dave Lister (a slovenly last surviving human) and Captain Jack Harkness (a complex omnisexual immortal), these
shows have both challenged and reinforced viewer expectations about the small-screen masculine hero. This book explores the construction of gendered heroic identity in the series from both production and...
fan perspectives. The paradoxical relationships between the producers, writers and fans of the four series are discussed. Fan fiction, criticism and videos are examined that...
both celebrate and criticize BBC science fiction heroes and villains. Science and science fiction have become inseparable—with common stories, interconnected thought experiments, and
shared language. This reference book lays out that relationship and its all-but-magical terms and ideas. Those who think seriously about the future are changing the world, reshaping how we speak and...
how we think. This book fully covers the terms that collected, clarified and crystallized the futurists' ideas, sometimes showing them off, sometimes slowing them down, and sometimes propelling them.
to fame and making them the common currency of our culture. The many entries in this encyclopedic work offer a guided tour of the vast territories occupied by science fiction and futurism. In
his Foreword, David Brin says, “Provocative and enticing? Filled with ‘huh!’ moments and leads to great stories? That describes this volume.”

A prolific author, Isaac Asimov is most
admired for his science fiction, including his collection of short stories I, Robot and his Robot, Empire and Foundation series novels. While each of these narratives takes place in a different fictional
universe, Asimov asserted at the end of his career that he had, with his last Robot and Foundation novels, unified them into one coherent metaseries. This reference work identifies and describes all of
the characters, locales, artifacts, concepts and institutions in Asimov’s metaseries. Mimicking the style of The Encyclopedia Galactica, the fictional compendium of all human
knowledge that features prominently in the Foundation series, this encyclopedia is an invaluable companion to Asimov’s science fiction oeuvre.
