There is no right or wrong answer. Sharing a run with a group or on your own can be very therapeutic for your mental and emotional health. It lets you release stress, and the act of exercising helps to release the feel-good hormones (endorphins) in our bodies. They call it “runner’s high” for a reason!

Training and Racing with a Power Meter brings the advanced power-based training techniques of elite cyclists and triathletes to everyone. A power meter can unlock more speed and endurance than any other training tool—but only if you understand the data. This new third edition of Training and Racing with a Power Meter updates the comprehensive guide that was last published almost 10 years ago. Using this updated guide, any rider can exploit the incredible usefulness of any power meter. Pioneering cycling coach Hunter Allen and exercise physiologists Dr. Andy Coggan and Stephen McGregor show how to use a power meter to find your baseline power data, profile your strengths and weakness, measure fitness and fatigue, optimize your daily workouts, peak for races, and set and adjust your racing strategy during a race. New in this third edition: All-new power metrics: FRC, FRC,
Pmax, mFTP, Power Duration Curve, and more

Two new power-based training plans for masters cyclists and triathletes

New training plans to raise Functional Threshold Power

Over 100 new power-based workouts

New guidance for triathletes on pacing the bike and run

New case studies on masters cyclists and triathletes

Methods to test power duration and pinpoint weaknesses in a variety of race distances

100 newly illustrated charts

Training and Racing with a Power Meter, 3rd Ed. is the definitive, comprehensive guide to using a power meter. Armed with the revolutionary techniques from this guide, cyclists and triathletes can achieve lasting improvements and their best performances ever.

Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future
performance and time peak form. Introduces fatigue profiling, a new testing method to pinpoint weaknesses. Includes two training plans to raise functional threshold power and time peaks for race day. Offers 75 power-based workouts tuned for specific training goals. This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

This practical book is aimed at all greyhound enthusiasts and will be of help to the more experienced professional trainer as well as the novice handler. The physical stresses of racing mean that every greyhound will, at some point, sustain some form of injury and it is therefore essential that the greyhound handler has some knowledge of injuries. Accordingly, the author places a strong emphasis on injury prevention, diagnosis, treatment and rehabilitation. Contents include: Choosing your first dog; The fundamental aspects of training; Kennelling; Breeding, rearing and training puppies; Exercising, the training routine and race preparation; Feeding; Examining your dog, minor ailments and serious illnesses; Foot problems; Injury rehabilitation and the skill of massage; Retired greyhounds. This wide-ranging and practical book is aimed at all greyhound enthusiasts including those who train and race them, care for them or own them as pets. Fully illustrated with 69 colour photographs and 20 drawings.

“Welcome to what will undoubtedly be a whole new level of
athleticperformance.”—Mark Allen, six-time winner of the Hawaii Ironman.

The complete book of cyclocross, Skill Training and Racing is a book about cyclocross its origins history and how to train and race. The book covers new skill training drills along with equipment selection.

Coach Joe Friel is the most trusted name in endurance sports coaching, and his Cyclist's Training Bible is the most comprehensive and reliable training resource ever written for cyclists. This new edition of the bestselling book includes all of the latest advances in training and technology. Using this book, cyclists can create a comprehensive, self-coached training plan that is both scientifically proven and shaped around their personal goals. Friel empowers athletes with every detail they need to consider when planning a season, lining up a week of workouts, or preparing to race. This fourth edition includes extensive revisions on the specifics of how to train and what to eat. Friel explains how cyclists can: best gauge intensity with power meters and other new training technology to maximize form and fitness and reduce fatigue; more knowledgeably and accurately make changes to their annual training plan over the course of a season; dramatically build muscular endurance with strength training; improve body composition and recovery with smarter nutrition. With more case studies to draw from and multiple contingency plans for those times when training doesn't progress as planned, The Cyclist's Training Bible continues to be the definitive guide to optimal cycling.
Matt Fitzgerald has already made a name for himself in the endurance sport community with books like 80/20 Running, How Bad Do You Want It? and Iron War. He is an accomplished amateur runner, but if he follows the training, nutrition and lifestyle of an elite runner, just how fast could he go? He is approaching his mid-forties, so the time to do this is now. He at last has the financial means to do nothing but train. He accepts the goodwill of a friend who will let him crash at his apartment in the running mecca of Flagstaff, Arizona, and convinces the coach of Northern Arizona Elite, one of the country's premier professional running teams, to let him train with a roster of national champions and Olympic hopefuls for an entire summer leading in to the Chicago Marathon. The results were astounding...Filled with a vibrant cast of characters, rigorous and gut-wrenching training, Matt’s knowledgeable yet self-deprecating voice allows us to vicariously live out our own fantasies of having the opportunity to go all the way. Yet for the runners Matt trains with, it’s no mere fantasy, but a calling and their individual stories enrich this inspiring narrative. Running the Dream is a chance for us all to experience a bit of this rarified and wild world, and to take away pieces of this amazing journey to try to achieve our own potential.

Covers all aspects of cycling, including the proper sitting position on the bicycle, fitness training, racing tips, and visualization for better cycling performance.
