philosophers, and Buddhist scholars develop a holistic approach to the scientific exploration of reality, but also adds scientific background to their presentations, as well as supplementary discussions with prominent participants and attendees. Interviews with His Holiness the Karmapa, the Buddhist monk Matthieu Ricard, and the actor and longtime human rights advocate Richard Gere take the proceedings into new directions, enriching the material with personal viewpoints and lively conversation about such topics as the origin of matter, the properties of cells, the nature of evolution, the ethics of genetic manipulation, and the question of consciousness and ethics. A keen study of character, Luisi incorporates his own amusing observations into this fascinating dialogue, painting a very human portrait of some of our greatest and most intimidating thinkers. Deeply textured and cleverly crafted, Mind and Life is an excellent opportunity for any reader to join in the debate surrounding this cutting-edge field of inquiry.

Discusses the nature of thought and volition, examines past philosophical theories, and clarifies the relation between will and freedom

In The Life of the Mind, Georgetown University’s James V. Schall takes up the task of reminding us that, as human beings, we naturally take a special delight and pleasure in simply knowing. Because we have not only bodies but also minds, we are built to know what is. In this volume, Schall, author of On the Unseriousness of Human Affairs (ISI Books), among many other volumes of philosophical and political reflection, discusses the various ways of approaching the delight of thinking and the way that this delight begins in seeing and hearing and even in making and walking. We must be attentive to and cultivate the needs of the mind, argues Schall, for it is through our intellect that all that is not ourselves is finally returned to us, allowing us to live in the light of truth.
